1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/18/07 has been entered.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagfors et al, U.S. Patent Application Publication 2002/0137416. Hagfors discloses a transfer belt comprising a fiber batt layer 3 which is impregnated with a polymer matrix. The polymer matrix may consist of polyurethane. Paragraph 0016 The fiber batt layer may be formed from cellulose, viscose, polyamides, (i.e. nylon), and animal fibers, among others, (paragraph 0014). The impregnated fiber batt layer is abraded to expose the fibers. See paragraph 0012.

3. Applicant's arguments have been fully considered but are moot in view of the new grounds of rejection.
